Max Opening (cm)	130	130	130	130
No. of Rams	2	2	2	3
Unladen Weight (kgs)	1280	1600	1920	2200

The Redrock series of All Round Blockcutters are both powerful and durable and have the ability to cut a clean block of silage from a silo, leaving a sealed and tidy silo face, preventing secondary fermentation. They can also be used as a bucket for handling loose materials. A wide range is designed to suit all types of farms, from large scale dairy, to the modest small holdings.

The 85 Series All Round is suitable for tractor front-end loaders and wheeled loaders with a lift capacity from 2 tonnes upwards.

Every Redrock All Round has bolt-on blades and stopper points for ease of service.

## 85 SERIES

The Redrock 100 Series All Round is suitable for use with wheeled loaders from 3 tonnes upwards. It is a robust, sturdy machine designed for heavy workloads.

### Unique Blades

All 85, 100 & 130 Series machines have unique bolt-on blades enabling easy service.

Made from specially tempered steel, these blades are supplied in small serrated sections. They are designed to stay sharp and cut through the silage clamp with minimum effort, leaving a perfect silage face.

A heavy duty Hardox bucket edge is fitted to all machines as standard. Also available are a wide range of bolt-on industrial and tractor loader brackets.

**100 SERIES**

The Redrock 130 Series All Round is suitable for larger industrial wheeled loaders offering unrivalled capacity.

The Redrock All Round 130 Series has a 130cm opening and is used to move large volumes of maize, grass silage and loose feedstuffs around the farm. This model is suitable for large scale livestock farms and bio-gas installations.

Redrock is a quality leader in agricultural machinery with an excellent reputation. For further information on the All Round Series visit our website [www.redrockmachinery.com](http://www.redrockmachinery.com)

**130 SERIES**

cut clean blocks of maize & grass silage

leaves a sealed silo face

used for loading loose feedstuffs

cuts straw & wrapped bales of silage with ease

no spillage of loose feedstuffs
