

C300 STRAW CHOPPER & BALE FEEDER

C300 STRAW CHOPPER & BALE FEEDER

REDROCK

Designed to perform....built to last!

The Redrock C300 Straw chopper & Bale Feeder

The Redrock C300 is specifically designed to chop and dispense straw, grass silage and hay. This is a versatile machine which is used for bedding and feeding when working with either bales of silage, hay, straw or even clamp silage. The Redrock C300 can be operated by tractors 65hp and above. It has a 3 metre cubed capacity and will handle both round and square bales. It features a self-loading rear door which can be used to load a bale into the machine without the need for a second tractor.

The Redrock C300 can also be used to pre-process straw for mixer wagons. Improving efficiency, reducing mixer wagon operating time and preventing over mixing of grass silage in a total mixed ration.

The Advantages

- 3m³ Capacity. Equipped with Beater Bar.
- Self loading rear door
- “V” shaped knives to cut wrapped grass silage and long straw for optimal shredding
- Hydraulic comb to regulate the shredding according to the material.
- Forward and reverse conveyor chain with easy adjustment.
- Intuitive electric controls, drive all functions of the machine from tractor cab.

Straw Bedding

Straw shredding and spreading to 18 metres, comfortable even layer.

Feeding Via The Chute

The Redrock C300 can feed either silage or hay via the chute directly on to the ground.

Materials

Round bale of Straw Ø 2 metre

Cubic bale Hay or Straw
1.2 x 0.9 x 2.5 metres max

Round bale of wrapped Silage
1.2 x Ø 1.5 metres

Capacity

1 + 1 on rear door

1

1 + 1 on rear door

Machine Dimensions

Overall Length (M).....	3.77
Overall Height (M).....	2.43
Overall Width (M).....	1.98
Distribution Height (M).....	1.5
Straw Spreading Height (M).....	2.5
Straw Spreading Length (M).....	18
Tractor HP Required.....	65HP
Oil Flow (L/Min).....	15-45
Operating Hydraulic Pressure.....	160 BAR

Redrock C300 Features

- Two Speed Gearbox
- Intuitive Electric Controls
- Fixed Drawbar
- Universal Chute
- Beater Bar
- Regulating Hydraulic Comb
- Regulated Conveyor
- Self loading Rear Door
